Pressure Switch EDS 300

Relative pressure

Display

Description:

The EDS 300 is a compact, electronic pressure switch with integrated digital display. The integrated pressure sensor is based on a measurement cell with thin-film strain gauge on a stainless steel membrane.

Four different output models are available: with one switch point or with two switch points and both models can also have an additional analogue output signal 4 .. 20 mA.

The switch points and the associated hystereses can be adjusted using the key pad. For optimum adaptation to a particular application, the instrument has many additional adjustment parameters, e.g. switching delay times, N/O / N/C function of the outputs.

The main applications of the EDS 300 are to indicate pressures and limits in hydraulics and pneumatics and anywhere where high switching frequency or constant switching accuracy would overburden a mechanical pressure switch.

Up to 2 switching outputs Analogue output

Setting options:All settings available on the EDS 300 are grouped in 2 easy-to-navigate menus. In order to prevent unauthorised adjustment of the device, a programming lock can be set.

Setting ranges for the switching outputs:

Additional functions:

- Switching mode of the switching outputs adjustable (switch point function or window
- Switching direction of the switching outputs adjustable (N/C or N/O function)
- Switch-on and switch-off delay adjustable from 0.0 .. 75.0 seconds
- Choice of display (actual pressure, peak value, switch point 1, switch point 2, display
- Optional analogue output signal 4 .. 20 mA
- Subsequent correction of zero point in the range ± 3 % FS possible

Electrical connection

- = male, Binder series 714 M18, 4 pole only possible on output models "2" and "3" (mating connector not supplied)
- = male, EN175301-803, 3 pole + PE 5 only possible on output model "1" (mating connector supplied)
- 6 = male M12x1, 4 pole only possible on output models "1", "2" and "3" (mating connector not supplied)
- 8 = male M12x1, 5 pole only possible on output model "5" (mating connector not supplied)

Output

- = 1 switching output
 - only in conjunction with electrical connection type "5" or "6"
- 2 = 2 switching outputs
 - only in conjunction with electrical connection type "4" or "6"
- = 1 switching output and 1 analogue output only in conjunction with electrical connection type "4" or "6"
- = 2 switching outputs and 1 analogue output only in conjunction with electrical connection type "8"
